the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2010 (WHO 1996).

One of the main causes of malnutrition is the lack of access to adequate food. This is often due to poverty, which prevents people from being able to afford to buy enough food. Another cause is the lack of access to land, which prevents people from being able to grow their own food.

There are many ways in which the nutritional status of the world's population can be improved. One way is to increase the production of food. Another way is to improve the distribution of food. A third way is to improve the quality of food.

There are many organizations that are working to improve the nutritional status of the world's population. These organizations include the United Nations, the World Bank, and the World Health Organization. They are all working to help people in need of food and nutrition.

There is a lot of work to be done to improve the nutritional status of the world's population. We need to work together to find ways to increase food production, improve food distribution, and improve food quality. Only then can we hope to reduce the number of undernourished people in the world.

There is a lot of work to be done to improve the nutritional status of the world's population. We need to work together to find ways to increase food production, improve food distribution, and improve food quality. Only then can we hope to reduce the number of undernourished people in the world.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of people with disabilities. In 1999, 1.5 million people were employed in the public sector, of whom 100,000 were people with disabilities. This represents 6.7% of the total public sector workforce, compared with 5.5% in 1990 and 4.5% in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In 1945, the first public sector employer of people with disabilities was the Ministry of Health, which employed a number of people with physical disabilities. This was followed by the Ministry of Education, which employed people with learning disabilities in the 1950s.

Another reason why the public sector has become an important employer of people with disabilities is that it has a large and growing workforce. In 1999, the public sector employed 4 million people, compared with 2.5 million in 1980. This increase in the public sector workforce has created a need for more people with disabilities to be employed in the public sector.

A third reason why the public sector has become an important employer of people with disabilities is that it has a high level of accessibility. The public sector has a long history of providing accessible services to people with disabilities. This has been achieved through a number of measures, including the provision of accessible premises, accessible transport, and accessible information.

Finally, the public sector has a high level of commitment to equality. The public sector has a long history of promoting equality for all people, regardless of their disability. This commitment to equality has led to the public sector becoming an important employer of people with disabilities.

In conclusion, the public sector has become an important employer of people with disabilities in the UK. This is due to a number of factors, including the public sector's long history of employing people with disabilities, its large and growing workforce, its high level of accessibility, and its commitment to equality.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of people with disabilities. In 1999, 1.5 million people were employed in the public sector, of whom 100,000 were people with disabilities. This represents 6.7% of the total public sector workforce, compared with 5.5% in 1990 and 4.5% in 1980.

There are a number of reasons why the public sector has become an important employer of people with disabilities. One reason is that the public sector has a long history of employing people with disabilities. In 1945, the first public sector employer of people with disabilities was the Ministry of Health, which employed a number of people with physical disabilities. This was followed by the Ministry of Education, which employed people with learning disabilities in the 1950s.

Another reason why the public sector has become an important employer of people with disabilities is that it has a large and growing workforce. In 1999, the public sector employed 4 million people, compared with 2.5 million in 1980. This increase in the public sector workforce has created a need for more people with disabilities to be employed in the public sector.

A third reason why the public sector has become an important employer of people with disabilities is that it has a high level of accessibility. The public sector has a long history of providing accessible services to people with disabilities. In 1999, 95% of public sector employers had accessible premises, compared with 85% in 1990 and 75% in 1980.

There are a number of challenges facing the public sector in its efforts to employ more people with disabilities. One challenge is that the public sector has a high level of competition for people with disabilities. In 1999, 100,000 people with disabilities were employed in the public sector, compared with 80,000 in 1990 and 60,000 in 1980. This increase in the number of people with disabilities employed in the public sector has created a need for more people with disabilities to be employed in the public sector.

Another challenge facing the public sector is that it has a high level of turnover. In 1999, 10% of the public sector workforce was new hires, compared with 8% in 1990 and 6% in 1980. This high level of turnover has created a need for more people with disabilities to be employed in the public sector.

A third challenge facing the public sector is that it has a high level of cost. In 1999, the public sector spent 1.5 million on employment of people with disabilities, compared with 1 million in 1990 and 800,000 in 1980. This increase in the cost of employing people with disabilities in the public sector has created a need for more people with disabilities to be employed in the public sector.

There are a number of ways in which the public sector can overcome these challenges and employ more people with disabilities. One way is to provide more accessible services to people with disabilities. The public sector can also provide more training and support to people with disabilities. Finally, the public sector can provide more incentives to employers to employ people with disabilities.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of children under 15 years of age in the world is projected to increase to 3.1 billion by 2015, with the largest increases occurring in the developing countries (United Nations, 1999).

There is a growing awareness of the need to address the needs of children in the world, and the United Nations has developed a set of goals for the year 2000, known as the Millennium Development Goals (MDGs). The MDGs are a set of eight goals that are intended to be achieved by the year 2000. The goals are: (1) to eradicate poverty, (2) to achieve universal primary education, (3) to promote gender equality, (4) to reduce child mortality, (5) to improve maternal health, (6) to combat HIV/AIDS, malaria, and other diseases, (7) to ensure environmental sustainability, and (8) to develop a global partnership for development (United Nations, 1999).
