the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world who are under 5 years of age has increased by 0.6 billion in the same period. The number of children in the world who are under 15 years of age is projected to increase by 1.2 billion by the year 2020 (United Nations 1999).

There is a growing concern that the rapid increase in the number of children in the world is leading to a decline in the quality of life for children. This is because the rapid increase in the number of children is leading to a decline in the resources available to each child. This is particularly true in developing countries, where the resources available to each child are already limited. This is a major concern for the world's leaders, who are trying to find ways to improve the quality of life for children in the world.

One of the ways to improve the quality of life for children is to improve the education system. This is because education is one of the most important factors in determining the quality of life for children. Education helps children to learn about the world around them, and it helps them to develop the skills they need to live a good life. Education also helps children to become responsible citizens, and it helps them to contribute to the development of their country.

Another way to improve the quality of life for children is to improve the health care system. This is because health care is one of the most important factors in determining the quality of life for children. Health care helps children to stay healthy, and it helps them to live longer. Health care also helps children to develop the skills they need to live a good life. Health care also helps children to become responsible citizens, and it helps them to contribute to the development of their country.

There are many other ways to improve the quality of life for children, but these are the two most important. By improving the education system and the health care system, we can help children to live a good life. This is the goal of the world's leaders, and it is the goal of all of us who care about the future of the world.
