the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and housing. The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and housing. The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a partnership, with 1.5 million people in a partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a friend, with 1.5 million people living with a friend employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a neighbour, with 1.5 million people living with a neighbour employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-parents, with 1.5 million non-parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are homeowners, with 1.5 million homeowners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-homeowners, with 1.5 million non-homeowners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are car owners, with 1.5 million car owners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-car owners, with 1.5 million non-car owners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are smokers, with 1.5 million smokers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-smokers, with 1.5 million non-smokers employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are drinkers, with 1.5 million drinkers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-drinkers, with 1.5 million non-drinkers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a friend, with 1.5 million people living with a friend employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a neighbour, with 1.5 million people living with a neighbour employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil marriage, with 1.5 million people in a civil marriage employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999 (United Nations 2000).

There is a growing awareness that the needs of children are different from those of adults, and that children have the right to be heard in decisions that affect them. The United Nations Convention on the Rights of the Child (1989) states that children have the right to be heard in decisions that affect them, and that their views should be given due weight in proportion to their age and maturity. The Convention also states that children have the right to be protected from all forms of violence, abuse and neglect, and that they have the right to a standard of living adequate for their health and well-being.

There is a growing awareness that children are not just passive recipients of care and protection, but active participants in their own lives. Children have the right to be heard in decisions that affect them, and their views should be given due weight in proportion to their age and maturity. The United Nations Convention on the Rights of the Child (1989) states that children have the right to be heard in decisions that affect them, and that their views should be given due weight in proportion to their age and maturity. The Convention also states that children have the right to be protected from all forms of violence, abuse and neglect, and that they have the right to a standard of living adequate for their health and well-being.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public in a cost-effective manner.

The public sector is a complex organisation, and it is difficult to measure its performance. However, there are a number of indicators that can be used to assess the performance of the public sector, and these are discussed in the following sections.

The first indicator is the cost of the services provided by the public sector. This is measured as the total cost of the services provided, divided by the number of people who receive the services.

The second indicator is the quality of the services provided. This is measured as the number of people who are satisfied with the services provided, divided by the total number of people who receive the services.

The third indicator is the efficiency of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services.

The fourth indicator is the accessibility of the services provided. This is measured as the number of people who are able to access the services, divided by the total number of people who are eligible for the services.

The fifth indicator is the equity of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The sixth indicator is the sustainability of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The seventh indicator is the transparency of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The eighth indicator is the accountability of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The ninth indicator is the responsiveness of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The tenth indicator is the effectiveness of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The eleventh indicator is the efficiency of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The twelfth indicator is the quality of the services provided. This is measured as the number of people who are satisfied with the services provided, divided by the total number of people who receive the services.

The thirteenth indicator is the efficiency of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services.

The fourteenth indicator is the accessibility of the services provided. This is measured as the number of people who are able to access the services, divided by the total number of people who are eligible for the services.

The fifteenth indicator is the equity of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

The sixteenth indicator is the sustainability of the services provided. This is measured as the number of people who receive the services, divided by the total number of people who are eligible for the services, with a weighting given to those who are most in need of the services.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased. The world population is now over 6 billion and is expected to reach 9 billion by the year 2050 (FAO 1996).

Another reason why the number of people who are undernourished has increased is that the world's food supply is not keeping pace with the world's population. The world's food supply is only enough to feed 6 billion people, but the world population is now over 6 billion and is expected to reach 9 billion by the year 2050 (FAO 1996).

A third reason why the number of people who are undernourished has increased is that the world's food supply is not distributed evenly. Some people have more food than they need, while others have less than they need. This is because the world's food supply is not distributed evenly (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the amount of land that is used for agriculture. Another way is to increase the amount of food that is produced on the same amount of land (FAO 1996).

There are a number of ways in which the world's food supply can be distributed more evenly. One way is to increase the amount of food that is donated to people who are undernourished. Another way is to increase the amount of food that is sold to people who are undernourished (FAO 1996).

There are a number of ways in which the world's food supply can be made more sustainable. One way is to use less land for agriculture. Another way is to use less water for agriculture. A third way is to use less fertilizer (FAO 1996).

There are a number of ways in which the world's food supply can be made more secure. One way is to increase the amount of food that is stored. Another way is to increase the amount of food that is transported. A third way is to increase the amount of food that is processed (FAO 1996).

There are a number of ways in which the world's food supply can be made more accessible. One way is to increase the amount of food that is sold in rural areas. Another way is to increase the amount of food that is sold in urban areas. A third way is to increase the amount of food that is sold in schools (FAO 1996).

There are a number of ways in which the world's food supply can be made more affordable. One way is to increase the amount of food that is sold at a discount. Another way is to increase the amount of food that is sold at a lower price. A third way is to increase the amount of food that is sold at a higher price (FAO 1996).

There are a number of ways in which the world's food supply can be made more nutritious. One way is to increase the amount of food that is fortified. Another way is to increase the amount of food that is enriched. A third way is to increase the amount of food that is fortified (FAO 1996).

There are a number of ways in which the world's food supply can be made more safe. One way is to increase the amount of food that is inspected. Another way is to increase the amount of food that is tested. A third way is to increase the amount of food that is inspected (FAO 1996).

There are a number of ways in which the world's food supply can be made more reliable. One way is to increase the amount of food that is stored. Another way is to increase the amount of food that is transported. A third way is to increase the amount of food that is processed (FAO 1996).

There are a number of ways in which the world's food supply can be made more sustainable. One way is to use less land for agriculture. Another way is to use less water for agriculture. A third way is to use less fertilizer (FAO 1996).

There are a number of ways in which the world's food supply can be made more secure. One way is to increase the amount of food that is stored. Another way is to increase the amount of food that is transported. A third way is to increase the amount of food that is processed (FAO 1996).

There are a number of ways in which the world's food supply can be made more safe. One way is to increase the amount of food that is inspected. Another way is to increase the amount of food that is tested. A third way is to increase the amount of food that is inspected (FAO 1996).

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2010 (WHO 1996).

One of the main causes of malnutrition is the lack of access to adequate food. This is often due to poverty, which prevents people from being able to afford to buy enough food. Another cause is the lack of access to land, which prevents people from being able to grow their own food.

There are a number of ways in which the nutritional status of the world's population can be improved. One way is to increase the production of food. This can be done by increasing the area of land that is used for agriculture, by increasing the productivity of the land, and by increasing the number of people who are involved in agriculture.

Another way to improve the nutritional status of the world's population is to increase the distribution of food. This can be done by increasing the number of people who are involved in the distribution of food, and by increasing the efficiency of the distribution system.

There are a number of other ways in which the nutritional status of the world's population can be improved. These include increasing the consumption of food, increasing the quality of the food, and increasing the access to food.

It is important to note that the nutritional status of the world's population is a complex issue. It is not simply a matter of increasing the production of food. It is also a matter of increasing the distribution of food, and of increasing the access to food.

There are a number of factors that can affect the nutritional status of the world's population. These include the availability of food, the quality of the food, and the access to food.

It is important to note that the nutritional status of the world's population is a complex issue. It is not simply a matter of increasing the production of food. It is also a matter of increasing the distribution of food, and of increasing the access to food.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased. The world population is now over 6 billion and is expected to reach 9 billion by the year 2050 (FAO 1996).

Another reason why the number of people who are undernourished has increased is that the world's food supply is not keeping pace with the world's population. The world's food supply is estimated to be 1.5 billion tonnes per year, which is not enough to feed the world's population of 6 billion people (FAO 1996).

A third reason why the number of people who are undernourished has increased is that the world's food supply is not distributed evenly. Some countries have a surplus of food, while others have a shortage. This is because of differences in the world's food production and distribution (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the world's food production. This can be done by increasing the world's food production and distribution (FAO 1996).

Another way to increase the world's food supply is to reduce the world's food waste. The world's food waste is estimated to be 1.5 billion tonnes per year, which is a significant amount of food that is being wasted (FAO 1996).

A third way to increase the world's food supply is to improve the world's food distribution. This can be done by improving the world's food distribution and ensuring that food is available to all people (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the world's food production. This can be done by increasing the world's food production and distribution (FAO 1996).

Another way to increase the world's food supply is to reduce the world's food waste. The world's food waste is estimated to be 1.5 billion tonnes per year, which is a significant amount of food that is being wasted (FAO 1996).
