the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. The most important is that the world's population is growing very rapidly. In 1990, the world's population was 5.3 billion. By 2000, it will be 6.1 billion. By 2010, it will be 6.9 billion. By 2020, it will be 7.7 billion (FAO 1996).

Another reason why the world's population is becoming more undernourished is that the world's food production is not keeping pace with the world's population growth. In 1990, the world produced 1.8 billion tonnes of food. By 2000, it will produce 2.1 billion tonnes. By 2010, it will produce 2.4 billion tonnes. By 2020, it will produce 2.7 billion tonnes (FAO 1996).

A third reason why the world's population is becoming more undernourished is that the world's food is not being distributed evenly. In 1990, 1.8 billion people were undernourished. By 2000, 2.1 billion people will be undernourished. By 2010, 2.4 billion people will be undernourished. By 2020, 2.7 billion people will be undernourished (FAO 1996).

There are a number of ways in which the world's food production can be increased. One way is to increase the area of land used for agriculture. Another way is to increase the yield of crops. A third way is to reduce food losses. A fourth way is to improve the distribution of food (FAO 1996).

There are a number of ways in which the world's food can be distributed more evenly. One way is to increase the number of people who are employed in agriculture. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be stored more effectively. One way is to increase the number of people who are employed in the food storage industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be consumed more effectively. One way is to increase the number of people who are employed in the food consumption industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be used more effectively. One way is to increase the number of people who are employed in the food use industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be disposed of more effectively. One way is to increase the number of people who are employed in the food disposal industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be recycled more effectively. One way is to increase the number of people who are employed in the food recycling industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be managed more effectively. One way is to increase the number of people who are employed in the food management industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be protected more effectively. One way is to increase the number of people who are employed in the food protection industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

There are a number of ways in which the world's food can be improved more effectively. One way is to increase the number of people who are employed in the food improvement industry. Another way is to increase the number of people who are employed in the food processing industry. A third way is to increase the number of people who are employed in the food distribution industry (FAO 1996).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own objectives and its own way of working. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own objectives and its own way of working. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.
