the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives. the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's economy and society. The increase in the number of people aged 65 and over is expected to lead to a decline in the number of people in the workforce, which will lead to a decline in the number of people who are able to pay taxes. This will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to support themselves. This will lead to a decline in the number of people who are able to pay for their own care, which will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education. This will lead to a decline in the quality of life for people aged 65 and over.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to work. This will lead to a decline in the number of people who are able to pay taxes, which will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education. This will lead to a decline in the quality of life for people aged 65 and over.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to live independently. This will lead to a decline in the number of people who are able to pay for their own care, which will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education. This will lead to a decline in the quality of life for people aged 65 and over.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to live in their own homes. This will lead to a decline in the number of people who are able to pay for their own care, which will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education. This will lead to a decline in the quality of life for people aged 65 and over.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to live in their own homes. This will lead to a decline in the number of people who are able to pay for their own care, which will lead to a decline in the amount of money that is available to the government to spend on public services, including health care and education. This will lead to a decline in the quality of life for people aged 65 and over.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998) and the number of people in the public sector who are employed in the health sector has increased by 1.2 million (from 1.3 million in 1980 to 2.5 million in 1998) (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of care in the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care. The Act requires health care providers to ensure that they meet certain standards of quality and safety. It also requires them to have in place a system of internal control and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical governance'. This is a system of internal control which is designed to ensure that health care providers are able to monitor and improve the quality of their care. It involves a number of activities, including the collection and analysis of data on the quality of care, the identification of areas for improvement, and the implementation of measures to improve the quality of care.

The Health Care Act 1999 also introduced the concept of 'clinical audit'. This is a process by which health care providers compare their performance against a set of standards. It involves the selection of a sample of cases, the collection of data on the quality of care, and the comparison of this data against the standards. The results of the audit are used to identify areas for improvement and to implement measures to improve the quality of care.

The Health Care Act 1999 also introduced the concept of 'clinical risk management'. This is a system of internal control which is designed to ensure that health care providers are able to identify and manage risks to the quality of care. It involves the identification of risks, the assessment of the likelihood of these risks occurring, and the implementation of measures to manage the risks.

The Health Care Act 1999 also introduced the concept of 'clinical research'. This is a process by which health care providers evaluate the effectiveness of new treatments or interventions. It involves the selection of a sample of patients, the collection of data on the effectiveness of the treatment or intervention, and the analysis of this data. The results of the research are used to inform the development of new treatments or interventions.

The Health Care Act 1999 also introduced the concept of 'clinical practice guidelines'. These are statements of best practice which are developed by experts in a particular field. They are used to inform the decision-making of health care providers. The Health Care Act 1999 requires health care providers to ensure that they are up to date with the latest clinical practice guidelines.

The Health Care Act 1999 also introduced the concept of 'clinical excellence'. This is a system of internal control which is designed to ensure that health care providers are able to achieve the highest standards of quality and safety. It involves the implementation of a number of measures, including the collection and analysis of data on the quality of care, the identification of areas for improvement, and the implementation of measures to improve the quality of care.

The Health Care Act 1999 also introduced the concept of 'clinical innovation'. This is a process by which health care providers develop new treatments or interventions. It involves the selection of a sample of patients, the collection of data on the effectiveness of the treatment or intervention, and the analysis of this data. The results of the innovation are used to inform the development of new treatments or interventions.
