--	--

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and the management of public infrastructure.

The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state. The public sector is funded by a variety of sources, including taxes, borrowing, and grants from the central government.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the quality of public services and to ensure that public services are delivered in a cost-effective manner. This has led to a number of initiatives to improve the quality of public services and to ensure that public services are delivered in a cost-effective manner.

One of the main initiatives to improve the quality of public services is the introduction of the Public Service Quality Standard (PSQS). The PSQS is a framework of standards that public service providers must meet in order to ensure that they are delivering high quality services to their customers.

The PSQS is a framework of standards that public service providers must meet in order to ensure that they are delivering high quality services to their customers. The standards are divided into three main areas: service quality, financial quality and environmental quality.

Service quality is the most important area of the PSQS. It covers a wide range of issues, including the quality of the service provided, the quality of the staff, the quality of the facilities and the quality of the information provided.

Financial quality is the second most important area of the PSQS. It covers issues such as the cost of the service, the quality of the financial management and the quality of the financial reporting.

Environmental quality is the third most important area of the PSQS. It covers issues such as the quality of the environment, the quality of the facilities and the quality of the information provided.
