the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law relationship, with 1.5 million people in a common-law relationship employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law relationship, with 1.5 million people in a common-law relationship employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key priorities for the NHS to meet the needs of older people. These priorities are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone has increased from 1.1 million in 1990 to 1.5 million in 2000 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone is projected to increase to 2.1 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to address the needs of older people living alone. The Department of Health (2000) has identified the need to develop a national strategy for older people living alone. The strategy should focus on the needs of older people living alone who are at risk of isolation and loneliness. The strategy should also focus on the needs of older people living alone who are at risk of poverty and social exclusion.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information economics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information sociology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased from 5 billion in 1980 to 6 billion in 1996 (FAO 1996).

Another reason is that the world population is growing faster than the world's food supply. The world population is growing at a rate of 1.2% per year, while the world's food supply is growing at a rate of 0.8% per year (FAO 1996).

A third reason is that the world's food supply is becoming more expensive. The price of food has increased by 50% in the last 10 years (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the amount of land that is used for agriculture. Another way is to increase the amount of water that is used for agriculture.

A third way is to increase the amount of fertilizer that is used for agriculture. A fourth way is to increase the amount of irrigation that is used for agriculture.

There are a number of ways in which the world's food supply can be made more efficient. One way is to reduce the amount of food that is wasted. Another way is to reduce the amount of food that is lost during transport.

A third way is to reduce the amount of food that is lost during storage. A fourth way is to reduce the amount of food that is lost during distribution.

There are a number of ways in which the world's food supply can be made more sustainable. One way is to reduce the amount of land that is used for agriculture. Another way is to reduce the amount of water that is used for agriculture.

A third way is to reduce the amount of fertilizer that is used for agriculture. A fourth way is to reduce the amount of irrigation that is used for agriculture.

There are a number of ways in which the world's food supply can be made more secure. One way is to reduce the amount of land that is used for agriculture. Another way is to reduce the amount of water that is used for agriculture.

A third way is to reduce the amount of fertilizer that is used for agriculture. A fourth way is to reduce the amount of irrigation that is used for agriculture.

There are a number of ways in which the world's food supply can be made more equitable. One way is to reduce the amount of land that is used for agriculture. Another way is to reduce the amount of water that is used for agriculture.

A third way is to reduce the amount of fertilizer that is used for agriculture. A fourth way is to reduce the amount of irrigation that is used for agriculture.

There are a number of ways in which the world's food supply can be made more healthy. One way is to reduce the amount of land that is used for agriculture. Another way is to reduce the amount of water that is used for agriculture.

A third way is to reduce the amount of fertilizer that is used for agriculture. A fourth way is to reduce the amount of irrigation that is used for agriculture.

There are a number of ways in which the world's food supply can be made more affordable. One way is to reduce the amount of land that is used for agriculture. Another way is to reduce the amount of water that is used for agriculture.

A third way is to reduce the amount of fertilizer that is used for agriculture. A fourth way is to reduce the amount of irrigation that is used for agriculture.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of measures to achieve these objectives. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the housing of older people. These measures are: (1) to increase the number of housing professionals who specialise in the care of older people; (2) to increase the number of housing professionals who are trained in the care of older people; (3) to increase the number of housing professionals who are qualified to provide care to older people; and (4) to increase the number of housing professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the transport of older people. These measures are: (1) to increase the number of transport professionals who specialise in the care of older people; (2) to increase the number of transport professionals who are trained in the care of older people; (3) to increase the number of transport professionals who are qualified to provide care to older people; and (4) to increase the number of transport professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the health of older people. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.
