the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the former Soviet Union, with 1.5 million people from the former Soviet Union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Caribbean, with 1.5 million people from the Caribbean employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Indian subcontinent, with 1.5 million people from the Indian subcontinent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Middle East, with 1.5 million people from the Middle East employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Pacific Islands, with 1.5 million people from the Pacific Islands employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Philippines, with 1.5 million people from the Philippines employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Republic of Ireland, with 1.5 million people from the Republic of Ireland employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the United States, with 1.5 million people from the United States employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the European Union, with 1.5 million people from the European Union employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Commonwealth of Independent States, with 1.5 million people from the Commonwealth of Independent States employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the African continent, with 1.5 million people from the African continent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Asian continent, with 1.5 million people from the Asian continent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Latin American continent, with 1.5 million people from the Latin American continent employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Middle East and North Africa, with 1.5 million people from the Middle East and North Africa employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the South and Central America, with 1.5 million people from the South and Central America employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Caribbean, with 1.5 million people from the Caribbean employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Pacific Islands, with 1.5 million people from the Pacific Islands employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Philippines, with 1.5 million people from the Philippines employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Republic of Ireland, with 1.5 million people from the Republic of Ireland employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the United States, with 1.5 million people from the United States employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the European Union, with 1.5 million people from the European Union employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Commonwealth of Independent States, with 1.5 million people from the Commonwealth of Independent States employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.5 billion to 0.7 billion (United Nations 1999). The number of people aged 65 and over is projected to increase to 1.2 billion by the year 2025 (United Nations 1999).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'enable older people to live lives of fulfilment and to contribute to the development of their societies' (WHO 1999, p. 1). The WHO strategy is based on the following principles:

- Older people should be able to live lives of fulfilment and to contribute to the development of their societies.
- Older people should be able to live in their own homes and communities.
- Older people should be able to participate in social and cultural activities.
- Older people should be able to access health and social services.

The WHO strategy is based on the following assumptions:

- Older people are a heterogeneous group.
- Older people have the right to live lives of fulfilment and to contribute to the development of their societies.
- Older people have the right to live in their own homes and communities.
- Older people have the right to participate in social and cultural activities.
- Older people have the right to access health and social services.

The WHO strategy is based on the following objectives:

- To enable older people to live lives of fulfilment and to contribute to the development of their societies.
- To enable older people to live in their own homes and communities.
- To enable older people to participate in social and cultural activities.
- To enable older people to access health and social services.

The WHO strategy is based on the following actions:

- To develop policies and strategies to meet the needs of older people.
- To develop health and social services for older people.
- To develop housing and community services for older people.
- To develop social and cultural services for older people.

The WHO strategy is based on the following principles:

- Older people should be able to live lives of fulfilment and to contribute to the development of their societies.
- Older people should be able to live in their own homes and communities.
- Older people should be able to participate in social and cultural activities.
- Older people should be able to access health and social services.

The WHO strategy is based on the following assumptions:

- Older people are a heterogeneous group.
- Older people have the right to live lives of fulfilment and to contribute to the development of their societies.
- Older people have the right to live in their own homes and communities.
- Older people have the right to participate in social and cultural activities.
- Older people have the right to access health and social services.

The WHO strategy is based on the following objectives:

- To enable older people to live lives of fulfilment and to contribute to the development of their societies.
- To enable older people to live in their own homes and communities.
- To enable older people to participate in social and cultural activities.
- To enable older people to access health and social services.

The WHO strategy is based on the following actions:

- To develop policies and strategies to meet the needs of older people.
- To develop health and social services for older people.
- To develop housing and community services for older people.
- To develop social and cultural services for older people.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.5 billion to 0.7 billion (United Nations, 2002). The number of people aged 65 and over is expected to increase to 1.2 billion by 2050 (United Nations, 2002).

There is a growing awareness of the need to address the needs of older people in the workplace. The World Health Organization (WHO) has identified the need for a 'healthy ageing' approach to the workplace (WHO, 2002). The WHO defines 'healthy ageing' as 'the process of developing and maintaining the functional ability that enables older people to live the lives they desire' (WHO, 2002, p. 1).

The WHO has identified a number of factors that contribute to healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002). The WHO has also identified a number of strategies for promoting healthy ageing, including: (1) the promotion of healthy living; (2) the promotion of healthy working conditions; (3) the promotion of healthy social relationships; (4) the promotion of healthy economic conditions; (5) the promotion of healthy cultural conditions; and (6) the promotion of healthy health services (WHO, 2002).

The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002). The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002).

The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002). The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002).

The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002). The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002).

The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002). The WHO has also identified a number of key areas for research on healthy ageing, including: (1) the physical environment; (2) the social environment; (3) the economic environment; (4) the cultural environment; (5) the health services environment; and (6) the individual's own characteristics (WHO, 2002).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. The public sector is now facing a number of challenges, including the need to reduce costs, the need to improve the quality of services, and the need to ensure that the public sector is able to deliver the services that are required by the public.

One of the main ways in which the public sector can improve its efficiency is by introducing competition. This can be done in a number of ways, including the introduction of competitive tendering, the introduction of public-private partnerships, and the introduction of new management practices.

Another way in which the public sector can improve its efficiency is by restructuring public services. This can be done in a number of ways, including the merging of public services, the restructuring of public services, and the introduction of new management practices.

Finally, the public sector can improve its efficiency by introducing new management practices. This can be done in a number of ways, including the introduction of new management practices, the introduction of new management practices, and the introduction of new management practices.

These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector. However, there is still a need to continue to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.

One of the main reasons for the need to continue to improve the efficiency of the public sector is the increasing pressure on public resources. The public sector is now facing a number of challenges, including the need to reduce costs, the need to improve the quality of services, and the need to ensure that the public sector is able to deliver the services that are required by the public.
