--	--	--

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' for the care of the elderly, one that is based on the principles of 'active ageing' and 'positive ageing'.

The purpose of this paper is to discuss the implications of the new paradigm for the care of the elderly and to propose a framework for the development of a new paradigm for the care of the elderly.

Background

The Department of Health (2000) has identified the need to develop a 'new paradigm' for the care of the elderly, one that is based on the principles of 'active ageing' and 'positive ageing'.

The purpose of this paper is to discuss the implications of the new paradigm for the care of the elderly and to propose a framework for the development of a new paradigm for the care of the elderly.

Active ageing

The World Health Organization (WHO) has defined 'active ageing' as the process of developing and maintaining the ability to participate in social, economic, cultural, spiritual and physical activities that are meaningful and enjoyable (WHO 2002).

The WHO has identified three key components of active ageing: (1) the ability to participate in social, economic, cultural, spiritual and physical activities; (2) the ability to maintain a level of physical and mental health that enables participation in these activities; and (3) the ability to maintain a level of financial resources that enables participation in these activities.

The WHO has identified a number of factors that influence the ability to participate in social, economic, cultural, spiritual and physical activities. These factors include: (1) the individual's physical and mental health; (2) the individual's financial resources; (3) the individual's social support network; and (4) the individual's access to social, economic, cultural, spiritual and physical activities.

The WHO has identified a number of strategies that can be used to promote active ageing. These strategies include: (1) the promotion of physical and mental health; (2) the promotion of financial resources; (3) the promotion of social support networks; and (4) the promotion of access to social, economic, cultural, spiritual and physical activities.

Positive ageing

The WHO has defined 'positive ageing' as the process of developing and maintaining a positive attitude towards ageing and the ability to participate in social, economic, cultural, spiritual and physical activities that are meaningful and enjoyable (WHO 2002).

The WHO has identified three key components of positive ageing: (1) the ability to participate in social, economic, cultural, spiritual and physical activities; (2) the ability to maintain a level of physical and mental health that enables participation in these activities; and (3) the ability to maintain a level of financial resources that enables participation in these activities.

The WHO has identified a number of factors that influence the ability to participate in social, economic, cultural, spiritual and physical activities. These factors include: (1) the individual's physical and mental health; (2) the individual's financial resources; (3) the individual's social support network; and (4) the individual's access to social, economic, cultural, spiritual and physical activities.

The WHO has identified a number of strategies that can be used to promote positive ageing. These strategies include: (1) the promotion of physical and mental health; (2) the promotion of financial resources; (3) the promotion of social support networks; and (4) the promotion of access to social, economic, cultural, spiritual and physical activities.

Conclusion

The WHO has identified the need to develop a 'new paradigm' for the care of the elderly, one that is based on the principles of 'active ageing' and 'positive ageing'. The purpose of this paper is to discuss the implications of the new paradigm for the care of the elderly and to propose a framework for the development of a new paradigm for the care of the elderly.
