the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of the elderly, which is based on the principles of 'active ageing' and 'positive ageing'. The 'new paradigm' is based on the idea that ageing is a process, and that the needs of the elderly are not fixed, but change over time. The 'new paradigm' is based on the idea that the elderly are not a homogeneous group, and that the needs of different groups of elderly people are different.

The 'new paradigm' is based on the idea that the elderly are not a homogeneous group, and that the needs of different groups of elderly people are different. The 'new paradigm' is based on the idea that the elderly are not a homogeneous group, and that the needs of different groups of elderly people are different. The 'new paradigm' is based on the idea that the elderly are not a homogeneous group, and that the needs of different groups of elderly people are different.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people. The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also a major employer, and it is important to understand how it works in order to be able to manage it effectively.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the importance of the public sector in the provision of health care, and the need to ensure that the public sector is able to meet the needs of the population. This has led to a number of initiatives, including the establishment of the National Health Service (NHS) and the creation of the Department of Health. The NHS is a public sector organization that provides health care to the population of the UK. The Department of Health is a government department that is responsible for the health of the population of the UK.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999). The United Nations predicts that by 2025, the number of people aged 65 and over will have increased to 1.1 billion, and the number of people under 15 years of age will have decreased to 1.4 billion.

There are a number of factors that are likely to contribute to the increase in the number of people aged 65 and over. One of the main factors is the increase in life expectancy. In 1990, the life expectancy at birth was 47 years for men and 51 years for women. By 2025, the life expectancy at birth is predicted to be 67 years for men and 72 years for women (United Nations, 1999). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Another factor that is likely to contribute to the increase in the number of people aged 65 and over is the decline in the birth rate. In 1990, the birth rate was 28 children per 1,000 women aged 15-44. By 2025, the birth rate is predicted to be 12 children per 1,000 women aged 15-44 (United Nations, 1999). This decline in the birth rate is due to a number of factors, including a decline in the number of children that women have, and a decline in the number of children that survive to the age of 5.

The increase in the number of people aged 65 and over is likely to have a number of consequences. One of the main consequences is the increase in the demand for social security and health care. In 1990, the total social security expenditure as a percentage of GDP was 10.5% for men and 12.5% for women. By 2025, the total social security expenditure as a percentage of GDP is predicted to be 20.5% for men and 25.5% for women (United Nations, 1999). This increase in social security expenditure is due to the increase in the number of people aged 65 and over, and the increase in the number of years that people aged 65 and over are expected to live.

Another consequence of the increase in the number of people aged 65 and over is the increase in the demand for health care. In 1990, the total health care expenditure as a percentage of GDP was 3.5% for men and 4.5% for women. By 2025, the total health care expenditure as a percentage of GDP is predicted to be 7.5% for men and 9.5% for women (United Nations, 1999). This increase in health care expenditure is due to the increase in the number of people aged 65 and over, and the increase in the number of years that people aged 65 and over are expected to live.

The increase in the number of people aged 65 and over is also likely to have a number of other consequences. For example, it is likely to lead to a decline in the number of people in the labour force, and a decline in the number of people who are able to support themselves. This is because people aged 65 and over are less likely to be employed, and are more likely to be dependent on others for support. This decline in the number of people in the labour force is likely to lead to a decline in the number of people who are able to support themselves, and a decline in the number of people who are able to contribute to the economy.

The increase in the number of people aged 65 and over is a major challenge for many countries. It is a challenge that requires a number of solutions. One of the main solutions is to improve the efficiency of social security and health care systems. This can be done by a number of ways, including by reducing the number of people who are eligible for social security and health care, and by reducing the cost of social security and health care. Another solution is to increase the number of people who are able to support themselves. This can be done by a number of ways, including by increasing the number of people who are employed, and by increasing the number of people who are able to contribute to the economy.
