the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.

The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999 (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector, and to ensure that the public sector is able to meet the needs of the population in a cost-effective manner (Department of Health 2000).

The aim of this paper is to review the literature on the impact of the public sector on the health of the population, and to discuss the implications for the future of the public sector.

1. Introduction

The public sector is the part of the economy that is owned and controlled by the state. It includes the health service, the education system, and the social security system.

The public sector is responsible for providing a range of services to the population, including health care, education, and social security. The public sector is also responsible for ensuring that these services are provided in a cost-effective manner.

The public sector has a significant impact on the health of the population. This paper reviews the literature on the impact of the public sector on the health of the population, and discusses the implications for the future of the public sector.

2. Methods

The literature was searched using the following keywords: public sector, health, population, and impact. The search was limited to the English language and to the period 1980–1999.

The search identified 100 articles. Of these, 10 were excluded as they were not relevant to the topic. The remaining 90 articles were reviewed.

The review identified a number of key findings. These are discussed in the following sections.

3. Results

The first finding is that the public sector has a significant impact on the health of the population. This is evident in a number of ways.

First, the public sector is responsible for providing a range of services to the population, including health care, education, and social security. The public sector is also responsible for ensuring that these services are provided in a cost-effective manner.

Second, the public sector has a significant impact on the health of the population. This is evident in a number of ways. For example, the public sector is responsible for providing a range of services to the population, including health care, education, and social security.

Third, the public sector has a significant impact on the health of the population. This is evident in a number of ways. For example, the public sector is responsible for providing a range of services to the population, including health care, education, and social security.

Fourth, the public sector has a significant impact on the health of the population. This is evident in a number of ways. For example, the public sector is responsible for providing a range of services to the population, including health care, education, and social security.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999 (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector, and to ensure that the public sector is able to meet the needs of the population in a cost-effective manner (Department of Health 2000).

The aim of this paper is to review the literature on the impact of the public sector on the health of the population, and to discuss the implications for the future of the public sector.

1. Introduction

The public sector is the part of the economy that is owned and controlled by the state. It includes the health service, the education system, and the social security system.

The public sector is responsible for providing a range of services to the population, including health care, education, and social security. The public sector is also responsible for ensuring that these services are provided in a cost-effective manner.

The public sector has a significant impact on the health of the population. This paper reviews the literature on the impact of the public sector on the health of the population, and discusses the implications for the future of the public sector.

2. Methods

The literature was searched using the following keywords: public sector, health, population, and impact. The search was conducted using the following databases: Medline, Psycinfo, and Sociofile.

The search was limited to the English language, and to the period 1980-1999. The search was conducted using the following criteria: the title of the article, the abstract, and the keywords.

The search identified 100 articles. The abstracts of these articles were reviewed, and 20 articles were selected for full-text review. The full-text review was conducted using the following criteria: the title of the article, the abstract, and the keywords.

3. Results

The results of the search are presented in Table 1. The table shows the number of articles identified for each keyword, and the number of articles selected for full-text review.

The results of the full-text review are presented in Table 2. The table shows the main findings of the 20 articles, and the implications for the future of the public sector.

The main findings of the 20 articles are as follows: the public sector has a significant impact on the health of the population; the public sector is responsible for providing a range of services to the population; and the public sector is also responsible for ensuring that these services are provided in a cost-effective manner.

The implications for the future of the public sector are as follows: the public sector should continue to provide a range of services to the population; the public sector should ensure that these services are provided in a cost-effective manner; and the public sector should be able to meet the needs of the population in a cost-effective manner.

4. Conclusion

The public sector has a significant impact on the health of the population. The public sector is responsible for providing a range of services to the population, and for ensuring that these services are provided in a cost-effective manner. The public sector should continue to provide a range of services to the population, and should ensure that these services are provided in a cost-effective manner.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.

One of the ways in which this can be achieved is by introducing competition into the public sector. This can be done in a number of ways, including the following:

- the introduction of private companies into the public sector;
- the introduction of competition between public sector organisations;
- the introduction of competition between public sector organisations and private companies.

Each of these methods has its own advantages and disadvantages, and it is important to consider these carefully when deciding which method to use.

One of the main advantages of introducing private companies into the public sector is that it can help to reduce the cost of the services provided. This is because private companies are often able to operate more efficiently than public sector organisations.

Another advantage of introducing private companies is that it can help to improve the quality of the services provided. This is because private companies are often able to provide a higher level of customer service than public sector organisations.

However, there are also some disadvantages to introducing private companies. One of the main disadvantages is that it can lead to a loss of control over the services provided. This is because private companies are not subject to the same level of public scrutiny as public sector organisations.

Another disadvantage is that it can lead to a loss of jobs. This is because private companies are often able to operate more efficiently than public sector organisations, which can result in a reduction in the number of people employed.

It is important to consider these advantages and disadvantages carefully when deciding which method to use. It is also important to consider the views of the public, as they are the ones who will be affected by the changes.

One of the ways in which the views of the public can be taken into account is by holding public consultations. This can help to ensure that the public is aware of the changes and has the opportunity to express their views.

It is also important to ensure that the public sector is able to deliver the services that are required by the public. This can be done by ensuring that the public sector is able to raise the necessary funds to do so.

One of the ways in which this can be achieved is by introducing a new system of funding. This can help to ensure that the public sector is able to raise the necessary funds to do so.

It is important to ensure that the public sector is able to deliver the services that are required by the public. This can be done by ensuring that the public sector is able to raise the necessary funds to do so.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures. The aim of these initiatives is to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner.

The aim of this paper is to review the literature on the impact of the public sector on the health of the population. The paper will focus on the impact of the public sector on the health of the population in the UK, and will consider the impact of the public sector on the health of the population in the context of the initiatives mentioned above.

The paper will first consider the impact of the public sector on the health of the population in the UK, and will then consider the impact of the public sector on the health of the population in the context of the initiatives mentioned above. The paper will conclude by discussing the implications of the findings for the future of the public sector.

2. Methods

The literature was searched using the following keywords: 'public sector', 'health', 'population', 'UK', 'efficiency', 'competition', 'restructuring', 'performance measures'. The search was conducted using the following databases: Medline, Psycinfo, and Sociofile.

The search was limited to the English language, and to the period 1980-1995. The search was conducted using the following criteria: the title of the article must contain the keywords, and the abstract must contain the keywords.

The search identified 100 articles. The articles were then screened on the basis of the title and abstract. The articles that were relevant to the topic were then included in the review.

The articles were then screened on the basis of the title and abstract. The articles that were relevant to the topic were then included in the review. The articles were then screened on the basis of the title and abstract. The articles that were relevant to the topic were then included in the review.
