the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There are a number of reasons why the public sector has expanded so rapidly. One of the main reasons is the increasing demand for health services. The population is ageing, and there is a growing incidence of chronic diseases such as heart disease, cancer, and diabetes. This has led to a corresponding increase in the number of people who are in need of health care.

Another reason for the expansion of the public sector is the increasing cost of health care. The cost of medical technology, drugs, and hospital care has risen steadily over the years. This has put a significant strain on the public sector, which is responsible for providing health care for all citizens.

Finally, there is the issue of equity. The public sector is responsible for ensuring that all citizens have access to health care, regardless of their income or social status. This has led to a corresponding increase in the size of the public sector, as it has had to provide care for a larger and more diverse population.

While the expansion of the public sector has been necessary, it has also led to a number of problems. One of the main problems is the increasing cost of health care. The public sector is now spending a significant portion of the national budget on health care, and this is likely to continue to rise in the future.

Another problem is the increasing demand for health services. The public sector is now responsible for providing care for a much larger population than in the past, and this has led to a corresponding increase in the number of people who are waiting for treatment.

Finally, there is the issue of quality. The public sector has often been criticized for providing a lower quality of care than the private sector. This is due to a number of factors, including a lack of competition, a focus on cost-cutting, and a lack of investment in research and development.

Despite these problems, the public sector remains the main provider of health care in the UK. It is responsible for ensuring that all citizens have access to health care, and it is also responsible for providing a high quality of care. While there are many challenges ahead, the public sector is well-placed to meet them.

the 'information' and 'communication' fields. The 'information' field is defined as:

Information science is the study of the nature, creation, organisation, storage, retrieval, communication, dissemination and use of information. It is an interdisciplinary field that draws on a wide range of disciplines, including library science, communication studies, computer science, sociology, psychology, and philosophy.

The 'communication' field is defined as:

Communication studies is the study of the processes of communication, including the production, distribution, and reception of messages. It is an interdisciplinary field that draws on a wide range of disciplines, including sociology, psychology, anthropology, and media studies.

The 'information' and 'communication' fields are closely related, and there is a significant overlap between them. The 'information' field is more concerned with the technical aspects of information, while the 'communication' field is more concerned with the social aspects of communication.

The 'information' and 'communication' fields are both important in the study of the social sciences. The 'information' field is important for understanding the role of information in society, while the 'communication' field is important for understanding the role of communication in society.
