the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. One of the main reasons is that the world's population is growing very rapidly. In 1990, there were 5.3 billion people in the world. By 2000, there will be 6.1 billion people in the world. By 2010, there will be 6.9 billion people in the world. By 2020, there will be 7.6 billion people in the world.

Another reason why the world's population is becoming more undernourished is that the world's food production is not keeping pace with the world's population growth. In 1990, the world produced 1.8 billion tonnes of food. By 2000, the world will produce 2.1 billion tonnes of food. By 2010, the world will produce 2.4 billion tonnes of food. By 2020, the world will produce 2.7 billion tonnes of food.

A third reason why the world's population is becoming more undernourished is that the world's food is not being distributed evenly. In 1990, 1.8 billion people in the world were undernourished. By 2000, 2.1 billion people in the world will be undernourished. By 2010, 2.4 billion people in the world will be undernourished. By 2020, 2.7 billion people in the world will be undernourished.

There are a number of ways in which the world's population can be made more food secure. One way is to increase the world's food production. Another way is to improve the world's food distribution. A third way is to reduce the world's population growth.

There are a number of ways in which the world's food production can be increased. One way is to use more land for agriculture. Another way is to use more water for agriculture. A third way is to use more fertilizers for agriculture.

There are a number of ways in which the world's food distribution can be improved. One way is to build more roads. Another way is to build more bridges. A third way is to build more ports.

There are a number of ways in which the world's population growth can be reduced. One way is to provide better education for women. Another way is to provide better health care for women. A third way is to provide better family planning services for women.
