There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on the following principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; (3) to ensure that older people are able to access the services they need; and (4) to ensure that older people are able to participate in the decisions that affect their lives. The strategy is a key document in the development of policy for older people in the UK.

There is a growing emphasis on the need to improve the quality of public services and to ensure that the public sector is efficient and effective. This has led to a number of initiatives, including the introduction of performance indicators, the establishment of public sector bodies, and the implementation of public sector reform.

The purpose of this paper is to examine the impact of public sector reform on the quality of public services. The paper will first review the literature on public sector reform and quality of public services. It will then discuss the impact of public sector reform on the quality of public services in the UK.

The paper is organized as follows. Section 2 reviews the literature on public sector reform and quality of public services. Section 3 discusses the impact of public sector reform on the quality of public services in the UK. Section 4 concludes.

2. Literature review

The literature on public sector reform and quality of public services is extensive. This section will review the literature on public sector reform and quality of public services in the UK.

The first strand of the literature focuses on the impact of public sector reform on the quality of public services. This literature has found that public sector reform has had a mixed impact on the quality of public services. Some studies have found that public sector reform has led to an improvement in the quality of public services, while others have found that public sector reform has led to a decline in the quality of public services.

The second strand of the literature focuses on the impact of public sector reform on the efficiency of public services. This literature has found that public sector reform has led to an improvement in the efficiency of public services. There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'enable older people to live longer, healthier, and more active lives'. The WHO strategy is based on three pillars: (1) 'Promoting healthy ageing', (2) 'Protecting older people from abuse and neglect', and (3) 'Supporting older people to live in their communities'. The WHO strategy is a framework for action, and it is up to individual countries to develop their own strategies to meet the needs of their ageing populations.
