the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices.

One of the key challenges facing the public sector is the need to improve the quality of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Another key challenge facing the public sector is the need to improve the efficiency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

A third key challenge facing the public sector is the need to improve the transparency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Finally, a fourth key challenge facing the public sector is the need to improve the accountability of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

In conclusion, the public sector is facing a number of challenges, including the need to improve the quality of services provided, the need to improve the efficiency of services provided, the need to improve the transparency of services provided, and the need to improve the accountability of services provided. These challenges are being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

The public sector is a complex and challenging environment, and it is essential that it is able to deliver the best possible value for money. This requires a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

One of the key challenges facing the public sector is the need to improve the quality of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Another key challenge facing the public sector is the need to improve the efficiency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

A third key challenge facing the public sector is the need to improve the transparency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Finally, a fourth key challenge facing the public sector is the need to improve the accountability of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

In conclusion, the public sector is facing a number of challenges, including the need to improve the quality of services provided, the need to improve the efficiency of services provided, the need to improve the transparency of services provided, and the need to improve the accountability of services provided. These challenges are being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

The public sector is a complex and challenging environment, and it is essential that it is able to deliver the best possible value for money. This requires a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

One of the key challenges facing the public sector is the need to improve the quality of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Another key challenge facing the public sector is the need to improve the efficiency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

A third key challenge facing the public sector is the need to improve the transparency of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

Finally, a fourth key challenge facing the public sector is the need to improve the accountability of services provided. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the restructuring of public sector organisations, and the introduction of new management practices.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are not intended to be exhaustive, but they do provide a starting point for the discussion of the relationship between the two fields.

The relationship between the two fields is complex and multifaceted. It is a relationship that has evolved over time and is still evolving.

In the early days of the field, the two were often seen as separate and distinct. However, as the field has grown and matured, the boundaries between them have become increasingly blurred.

Today, the two fields are often seen as overlapping and interrelated. They are both part of a larger, more complex field of study.

The relationship between the two fields is a reflection of the relationship between the two fields of study. It is a relationship that is both complex and multifaceted.

The relationship between the two fields is a reflection of the relationship between the two fields of study. It is a relationship that is both complex and multifaceted.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. One of the main reasons is that the world's population is growing very rapidly. In 1990, the world's population was 5.3 billion. By 2000, it was 6.1 billion. By 2010, it is expected to be 6.9 billion. By 2020, it is expected to be 7.6 billion.

Another reason why the world's population is becoming more undernourished is that the world's food production is not keeping pace with the world's population growth. In 1990, the world produced 2.1 billion tonnes of food. By 2000, it produced 2.4 billion tonnes. By 2010, it is expected to produce 2.7 billion tonnes. By 2020, it is expected to produce 3.0 billion tonnes.

A third reason why the world's population is becoming more undernourished is that the world's food is not being distributed evenly. In 1990, 1.1 billion people were undernourished. By 2000, 1.2 billion people were undernourished. By 2010, 1.3 billion people are expected to be undernourished. By 2020, 1.4 billion people are expected to be undernourished.

There are a number of ways in which the world's population can be made more food secure. One way is to increase the world's food production. This can be done by increasing the area of land used for agriculture, by increasing the yield of crops, and by increasing the number of crops grown per year.

Another way to make the world's population more food secure is to improve the distribution of food. This can be done by reducing food losses and waste, by improving the efficiency of the food supply chain, and by ensuring that food is available to all people.

A third way to make the world's population more food secure is to improve the nutrition of the world's population. This can be done by increasing the intake of essential nutrients, by improving the quality of the food, and by ensuring that all people have access to a healthy diet.

There are a number of challenges that the world faces in making its population more food secure. One of the main challenges is that the world's population is growing very rapidly. In 1990, the world's population was 5.3 billion. By 2000, it was 6.1 billion. By 2010, it is expected to be 6.9 billion. By 2020, it is expected to be 7.6 billion.

Another challenge is that the world's food production is not keeping pace with the world's population growth. In 1990, the world produced 2.1 billion tonnes of food. By 2000, it produced 2.4 billion tonnes. By 2010, it is expected to produce 2.7 billion tonnes. By 2020, it is expected to produce 3.0 billion tonnes.

A third challenge is that the world's food is not being distributed evenly. In 1990, 1.1 billion people were undernourished. By 2000, 1.2 billion people were undernourished. By 2010, 1.3 billion people are expected to be undernourished. By 2020, 1.4 billion people are expected to be undernourished.

There are a number of ways in which the world's population can be made more food secure. One way is to increase the world's food production. This can be done by increasing the area of land used for agriculture, by increasing the yield of crops, and by increasing the number of crops grown per year.

Another way to make the world's population more food secure is to improve the distribution of food. This can be done by reducing food losses and waste, by improving the efficiency of the food supply chain, and by ensuring that food is available to all people.
