the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures. The aim of these initiatives is to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner.

The aim of this paper is to review the literature on the impact of these initiatives on the public sector, and to discuss the implications for the future of the public sector.

The paper is organised as follows. Section 2 discusses the impact of competition on the public sector. Section 3 discusses the impact of restructuring on the public sector. Section 4 discusses the impact of performance measures on the public sector. Section 5 discusses the implications for the future of the public sector.

2. Competition

The introduction of competition into the public sector has been a major initiative in the 1990s. This has led to a number of changes in the way that public sector organisations operate, and has led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the introduction of competition is the need to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

The introduction of competition has led to a number of changes in the way that public sector organisations operate. For example, public sector organisations have been encouraged to compete for contracts, and to improve their efficiency and effectiveness.

One of the main benefits of the introduction of competition is the reduction in costs. This has been achieved by a number of measures, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

Another benefit of the introduction of competition is the improvement in the quality of services. This has been achieved by a number of measures, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

However, there are also a number of potential drawbacks to the introduction of competition. For example, the introduction of competition may lead to a reduction in the quality of services, and may lead to a reduction in the number of jobs in the public sector.

It is therefore important to monitor the impact of the introduction of competition on the public sector, and to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner.

3. Restructuring

The restructuring of public sector organisations has been a major initiative in the 1990s. This has led to a number of changes in the way that public sector organisations operate, and has led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the restructuring of public sector organisations is the need to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

The restructuring of public sector organisations has led to a number of changes in the way that public sector organisations operate. For example, public sector organisations have been encouraged to improve their efficiency and effectiveness, and to reduce their costs.

One of the main benefits of the restructuring of public sector organisations is the reduction in costs. This has been achieved by a number of measures, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.
