the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the population. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance targets.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public sector budgets. This is due to a number of factors, including the increasing cost of health care, the increasing cost of social care, and the increasing cost of education.

Another reason for the need to improve the efficiency of the public sector is the increasing demand for public services. This is due to a number of factors, including the increasing population, the increasing demand for health care, and the increasing demand for social care.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public sector organisations, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public sector contracts, or by allowing private companies to take over public sector organisations.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public sector organisations. This can be done by merging public sector organisations, or by transferring public sector functions to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public sector organisations, and to ensure that they are able to deliver the services that are required by the population.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that the public sector is able to deliver the services that are required by the population, and the need to ensure that the public sector is able to operate within its budget.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is a major part of the economy, and it is essential that it is able to deliver the services that are required by the population.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information creation, organisation, storage, retrieval, dissemination and use, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to develop a new generation of young people who are able to take advantage of the opportunities that the new technologies offer. The challenge is to ensure that the young people of the future are equipped with the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology.

One of the key challenges is to ensure that young people are able to develop the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology. This requires a focus on developing the young people's ability to learn and to adapt to change.

Another key challenge is to ensure that young people are able to develop the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology. This requires a focus on developing the young people's ability to learn and to adapt to change.

A third key challenge is to ensure that young people are able to develop the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology. This requires a focus on developing the young people's ability to learn and to adapt to change.

Finally, a fourth key challenge is to ensure that young people are able to develop the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology. This requires a focus on developing the young people's ability to learn and to adapt to change.

In conclusion, the challenges facing the young people of the future are many and varied. However, by focusing on developing the young people's ability to learn and to adapt to change, we can ensure that they are equipped with the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology.

The challenges facing the young people of the future are many and varied. However, by focusing on developing the young people's ability to learn and to adapt to change, we can ensure that they are equipped with the skills and knowledge that will enable them to succeed in a world that is increasingly dominated by technology.

The challenges facing the young people of the future are many and varied. the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the 1990s. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a number of reports and guidelines for the development of child health and family planning services (UNICEF 1990, 1992, 1993, 1994).

The purpose of this paper is to review the current state of knowledge on the needs of children in the 1990s, and to discuss the implications for the development of child health and family planning services. The paper is organized into three main sections: (1) the needs of children in the 1990s, (2) the development of child health and family planning services, and (3) the implications for the future.

1. Needs of children

The needs of children in the 1990s are complex and multifaceted. They include the need for basic health care, education, and social services. The needs of children are also influenced by the social and economic conditions of the country in which they live. In developing countries, the needs of children are often more acute than in developed countries.

The needs of children in the 1990s are also changing. As the world population grows, the needs of children are becoming more diverse. There is a growing need for child health and family planning services, and for child education and social services.

The needs of children in the 1990s are also being recognized by the international community. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a number of reports and guidelines for the development of child health and family planning services (UNICEF 1990, 1992, 1993, 1994).

The purpose of this paper is to review the current state of knowledge on the needs of children in the 1990s, and to discuss the implications for the development of child health and family planning services. The paper is organized into three main sections: (1) the needs of children in the 1990s, (2) the development of child health and family planning services, and (3) the implications for the future.

2. Development of services

The development of child health and family planning services is a complex task. It requires the involvement of a number of different stakeholders, including the government, the private sector, and the community. The development of these services is also influenced by the social and economic conditions of the country in which they are being developed.

The development of child health and family planning services is also being recognized by the international community. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a number of reports and guidelines for the development of child health and family planning services (UNICEF 1990, 1992, 1993, 1994).

The purpose of this paper is to review the current state of knowledge on the needs of children in the 1990s, and to discuss the implications for the development of child health and family planning services. The paper is organized into three main sections: (1) the needs of children in the 1990s, (2) the development of child health and family planning services, and (3) the implications for the future.

3. Implications for the future

The implications for the future of child health and family planning services are complex and multifaceted. They include the need for continued research and development, and for the implementation of the findings of this research.
